

Muhammed Nihal C Y

Full-Stack Developer

Kerala, India | +91 9526853280 | mnihalcy@gmail.com | GitHub | Portfolio | LinkedIn

Summary

I'm a **full-stack developer** with a focus on **Node.js** and **React**. I've spent my career **building scalable SaaS platforms** and **high-performance WordPress plugins** that now power over **500,000+ websites worldwide**. I enjoy diving into **system design** and **performance tuning** to make sure everything I build is both fast and easy to maintain.

Professional Experience

Full-Stack Developer - Apoxeo Solutions | Bangalore, Karnataka | April 2026 – Present

- **Lead the development team** for the ERP project, overseeing **end-to-end architecture** and implementation
- Implemented **numerous new features** across the project
- Introduced **significant security improvements** to enhance **system integrity**
- Scaled ERP system from single-branch to **multi-branch architecture** using **Node.js** and **Express.js**
- Developed **frontend features** with **React** for improved **usability**
- Handled **SEO optimization** and **crawler-related issues**
- Implemented **location-based services** (**nearest branch detection**)
- Developed a **personalized AI chatbot**, **optimizing token usage and performance**
- Developed and maintained **various microservices** for the ERP system to enhance **scalability** and **modularity**.

Software Engineer - Zennode Technologies | Calicut, Kerala | March 2024 – February 2026

- **Architected** and **optimized** high-traffic **WordPress plugins** and **microservices**, supporting over **500,000 global e-commerce instances** with a focus on **system reliability** and **performance tuning**.
- **Engineered** **scalable frontend architectures** and **responsive UI components**, prioritizing **Core Web Vitals**, **SEO optimization**, and **WCAG accessibility standards**.
- **Conducted deep-dive performance profiling** and **eliminated critical bottlenecks** to ensure **high availability** and **cross-platform stability**.
- Developed **internal automation tools** that made **content management** easier and boosted **user interaction**.

Freelance Full-Stack Developer | Remote | April 2022 – March 2024

- **Designed** and **deployed** end-to-end **ERP** and **CRM ecosystems**, implementing robust **backend infrastructures** and intuitive **data-driven dashboards**.
- Crafted **responsive frontends** using **React** and **Tailwind CSS**.
- Set up **secure REST APIs** using **Node.js**, **Express**, and **MongoDB**.
- **Sped up systems by about 30%** by cleaning up code and **optimizing database queries**.

Core Skills

Backend: Node.js, Express.js, REST APIs, Microservices, WebSockets

Frontend: React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL, Redis

DevOps: Docker, CI/CD, Git

Architecture: Microservices, Modular Design, RBAC, JWT Auth

Projects

Gift Card SaaS Platform | Full-Stack Project — Repository

- **Developed** a **multi-tenant Gift Card SaaS** utilizing a modern stack of **Node.js**, **Next.js**, and **PostgreSQL** with **Redis caching** for **high-concurrency handling**.
- Handled security using **JWT** and **role-based access controls**.
- Integrated **Prisma ORM** for efficient **data modelling** and implemented **BullMQ** for **asynchronous background job processing** to maintain **system throughput** under heavy loads.
- Designed a clean, real-time analytics dashboard with **Next.js** and **Tailwind**.

- Managed the whole gift card process, from creation to delivery via email or SMS, plus QR-based redemptions.

Online Hotel Room Booking System — Live | Repository

- **Created** a hotel booking site using the **MERN stack (MongoDB, Express, React, Node)**.
- Set up the login system and real-time room management.
- Focused on a clean, **mobile-friendly UI** and used **Docker** for deployment.

Zevvo File Upload for WooCommerce

- Developed a WordPress plugin enabling customers to upload files directly on product pages, featuring a drag-and-drop interface and seamless WooCommerce order integration.
- Implemented secure, GDPR-compliant file storage with randomized naming and automatic cleanup, while ensuring compatibility with HPOS and Gutenberg.

Content Freshness Monitor

- Engineered an SEO-focused WordPress plugin to combat content decay, featuring a color-coded "freshness" dashboard and proprietary Engagement Score analytics.
- Optimized performance by utilizing custom database tables and background processes, ensuring zero impact on frontend load times while enabling automated audits of posts and WooCommerce products.

Education

Diploma in Computer Engineering — Government Polytechnic College, Kunnampalam, Kerala | 2023 | CGPA: 7.88
